# Contents of Volume 42 (1996)

## No. 1, January 1996

*Special Issue: SINEs, LINEs, and Retrotransposable Elements*

**Introduction** 1

**M.A. Batzer, P.L. Deininger, U. Hellmann-Blumberg, J. Jurka, D. Labuda, C.M. Rubin, C.W. Rubin, C.W. Schmid, E. Zietkiewicz, E. Zuckerkandl**
Standardized Nomenclature for Alu Repeats **3**

**D.H. Kass, J. Kim, P.L. Deininger**
Sporadic Amplification of ID Elements in Rodents **7**

**T.H. Shaikh, P.L. Deininger**
The Role and Amplification of the HS Alu Subfamily Founder Gene **15**

**M.A. Batzer, S.S. Arcot, J.W. Phinney, M. Alegria-Hartman, D.H. Kass, S.M. Milligan, C. Kimpton, P. Gill, M. Hochmeister, P.A. Ioannou, R.J. Herrera, D.A. Boudreau, W.D. Scheer, B.J.B. Keats, P.L. Deininger, M. Stoneking**
Genetic Variation of Recent Alu Insertions in Human Populations **22**

**I. Chesnokov, C.W. Schmid**
Flanking Sequences of an Alu Source Stimulate Transcription In Vitro by Interacting with Sequence-Specific Transcription Factors **30**

**C. Prades, A.-M. Laurent, J. Puechberty, Y. Yurov, G. Roizes**
SINE and LINE Within Human Centromeres **37**

**R.N. Lee, J.C. Jaskula, R.A. Van Den Bussche, R.J. Baker, H.A. Wichman**
Retrotransposon *Mys* Was Active During Evolution of the *Peromyscus leucopus-maniculatus* Complex **44**

**J.E. Clough, J.A. Foster, M. Barnett, H.A. Wichman**
Computer Simulation of Transposable Element Evolution: Random Template and Strict Master Models **52**

**V. Kapitonov, J. Jurka**
The Age of Alu Subfamilies **59**

**E. Zietkiewicz, D. Labuda**
Mosaic Evolution of Rodent B1 Elements **66**

## No. 2, February 1996

**A. Eyre-Walker**
The Close Proximity of *Escherichia coli* Genes: Consequences for Stop Codon and Synonymous Codon Use **73**

**R.R. Wagner, M.A. Riley**
Low Synonymous Site Variation at the *lacY* Locus in *Escherichia coli* Suggests the Action of Positive Selection **79**

**A. Del Campillo Campbell, A. Campbell**
Alternative Gene for Biotin Sulfoxide Reduction in *Escherichia coli* K-12 **85**

**A. Jeltsch, A. Pingoud**
Horizontal Gene Transfer Contributes to the Wide Distribution and Evolution of Type II Restriction-Modification Systems **91**

**P.L. Bollyky, A. Rambaut, P.H. Harvey, E.C. Holmes**
Recombination Between Sequences of Hepatitis B Virus from Different Genotypes **97**

**N. Takasaki, L. Park, M. Kaeriyama, A.J. Gharrett, N. Okada**
Characterization of Species-Specifically Amplified SINEs in Three Salmonid Species—Chum Salmon, Pink Salmon, and Kokanee: The Local Environment of the Genome May Be Important for the Generation of a Dominant Source Gene at a Newly Retroposed Locus **103**

**D.M. Milewicz, P.H. Byers, J. Reveille, A.L. Hughes, M. Duvic**
A Dimorphic Alu Sb-Like Insertion in COL3A1 Is Ethnic-Specific **117**

**Z.-H. Su, T. Ohama, T.S. Okada, K. Nakamura, R. Ishikawa, S. Osawa**
Phylogenetic Relationships and Evolution of the Japanese Carabinae Ground Beetles Based on Mitochondrial ND5 Gene Sequences **124**

**Z.-H. Su, T. Ohama, T.S. Okada, K. Nakamura, R. Ishikawa, S. Osawa**
Geography-Linked Phylogeny of the *Damaster* Ground Beetles Inferred from Mitochondrial ND5 Gene Sequences **130**

**C. Ledje, U. Arnason**
Phylogenetic Analyses of Complete Cytochrome *b* Genes of the Order Carnivora with Particular Emphasis on the Caniformia **135**

**U. Arnason, X. Xu, A. Gullberg**
Comparison Between the Complete Mitochondrial DNA Sequences of *Homo* and the Common Chimpanzee Based on Nonchimeric Sequences **145**

**A. Janke, N.J. Gemmell, G. Feldmaier-Fuchs, A. Von Haeseler, S. Paabo**
The Mitochondrial Genome of a Monotreme—The Platypus (*Ornithorhynchus anatinus*) **153**

**J.A. Terrett, S. Miles, R.H. Thomas**
Complete DNA Sequence of the Mitochondrial Genome of *Cepaea nemoralis* (Gastropoda: Pulmonata) **160**

**G. Ortí, P. Petry, J.I.R. Porto, M. Jégu, A. Meyer**
Patterns of Nucleotide Change in Mitochondrial Ribosomal RNA Genes and the Phylogeny of Piranhas **169**

**S. Kumar, A. Rzhetsky**
Evolutionary Relationships of Eukaryotic Kingdoms **183**

**B. Nelissen, R. De Baere, A. Wilmotte, R. De Wachter**
Phylogenetic Relationships of Nonaxenic Filamentous Cyanobacterial Strains Based on 16S rRNA Sequence Analysis **194**

**Y. Van De Peer, G. Van Der Auwera, R. De Wachter**
The Evolution of Stramenopiles and Alveolates as Derived by "Substitution Rate Calibration" of Small Ribosomal Subunit RNA **201**

**G.B. Nunn, B.F. Theisen, B. Christensen, P. Arctander**
Simplicity-Correlated Size Growth of the Nuclear 28S Ribosomal RNA D3 Expansion Segment in the Crustacean Order Isopoda **211**

**G. Thode, J.A. García-Ranea, J. Jimenez**
Search for Ancient Patterns in Protein Sequences **224**

**C.A. Ouzounis, N.C. Kyrpides**
Parallel Origins of the Nucleosome Core and Eukaryotic Transcription from Archaea **234**

**C. Rocchini, R.M. Marx, J. Schnorr Von Carosfeld, H.E. Kasinsky, E. Rosenberg, F. Sommer, J. Ausio**
Replacement of Nucleosomal Histones by Histone H1-Like Proteins During Spermiogenesis in Cnidaria: Evolutionary Implications **240**

**A.L. Hughes**
Evolution of the *src*-Related Protein Tyrosine Kinases **247**

**T. Kamaishi, T. Hashimoto, Y. Nakamura, F. Nakamura, S. Murata, N. Okada, K.-I. Okamoto, M. Shimizu, M. Hasegawa**
Protein Phylogeny of Translation Elongation Factor EF-1$\alpha$ Suggests Microsporidians Are Extremely Ancient Eukaryotes **257**

**K.D. Mehta, R. Chang, J. Norman**
*Chiloscyllium plagiosum* Low-Density Lipoprotein Receptor: Evolutionary Conservation of Five Different Functional Domains **264**

**P.A. McLenachan, P.J. Lockhart, H.R. Faber, B.C. Mansfield**
Evolutionary Analysis of the Multigene Pregnancy-Specific $\beta_1$-Glycoprotein Family: Separation of Historical and Nonhistorical Signals **273**

**J.H. Parish, J. Bentley**
Relationships Between Bacterial Drug Resistance Pumps and Other Transport Proteins **281**

**Z. Yang**
Phylogenetic Analysis Using Parsimony and Likelihood Methods **294**

**J. Sullivan, K.E. Holsinger, C. Simon**
The Effect of Topology on Estimates of Among-Site Rate Variation **308**

**J.M. Koshi, R.A. Goldstein**
Probabilistic Reconstruction of Ancestral Protein Sequences **313**

*Letter to the Editor*
**T.H. Jukes, S. Osawa**
CUG Codons in *Candida* spp. **321**

## No. 3, March 1996

**D. Proudhon, J. Wei, J.-F. Briat, E.C. Theil**
Ferritin Gene Organization: Differences Between Plants and Animals Suggest Possible Kingdom-Specific Selective Constraints **325**

**W.S. Modi, D.S. Gallagher, J.E. Womack**
Evolutionary Histories of Highly Repeated DNA Families Among the Artiodactyla (Mammalia) **337**

**Đ. Ugarković, S. Durajlija, M. Plohl**
Evolution of *Tribolium madens* (Insecta, Coleoptera) Satellite DNA Through DNA Inversion and Insertion **350**

**P. Capy, R. Vitalis, T. Langin, D. Higuet, C. Bazin**
Relationships Between Transposable Elements Based Upon the Integrase-Transposase Domains: Is There a Common Ancestor? **359**

**M.D. Moltó, N. Paricio, M.A. López-Preciado, V.F. Semeshin, M.J. Martínez-Sebastián**
*Tirant:* A New Retrotransposon-Like Element in *Drosophila melanogaster* **369**

## No. 4, April 1996

**T.H. Jukes**
On the Prevalence of Certain Codons ("RNY") in Genes for Proteins **377**

**E.M. Denovan-Wright, D. Sankoff, D.F. Spencer, R.W. Lee**
Evolution of Fragmented Mitochondrial Ribosomal RNA Genes in *Chlamydomonas* **382**

**E. Rosato, A.A. Peixoto, A. Gallippi, C.P. Kyriacou, R. Costa**
Mutational Mechanisms, Phylogeny, and Evolution of a Repetitive Region Within a Clock Gene of *Drosophila melanogaster* **392**

**H. Hächler, S.P. Cohen, S.B. Levy**
Untranslated Sequence Upstream of MarA in the Multiple Antibiotic Resistance Locus of *Escherichia coli* Is Related to the Effector-Binding Domain of the XylS Transcriptional Activator **409**

**D. Rouhbakhsh, C.-Y. Lai, C.D. von Dohlen, M.A. Clark, L. Baumann, P. Baumann, N.A. Moran, D.J. Voegtlin**
The Tryptophan Biosynthetic Pathway of Aphid Endosymbionts (*Buchnera*): Genetics and Evolution of Plasmid-Associated Anthranilate Synthase (*trpEG*) Within the Aphididae **414**

**M. Sahrawy, V. Hecht, J. Lopez-Jaramillo, A. Chueca, Y. Chartier, Y. Meyer**
Intron Position as an Evolutionary Marker of Thioredoxins and Thioredoxin Domains **422**

**J. Zhou, A. Kleinhofs**
Molecular Evolution of Nitrate Reductase Genes **432**

**C. Vieira, C. Biémont**
Geographical Variation in Insertion Site Number of Retrotransposon 412 in *Drosophila simulans* **443**

**S. Niewiesk, C.R.M. Bangham**
Evolution in a Chronic RNA Virus Infection: Selection on HTLV-I Tax Protein Differs Between Healthy Carriers and Patients with Tropical Spastic Paraparesis **452**

**J. Adachi, M. Hasegawa**
Model of Amino Acid Substitution in Proteins Encoded by Mitochondrial DNA **459**

*Letters to the Editor*
**J.E. Mayfield, M.R. Duvall**
Anomalous Phylogenies Based on Bacterial Catalase Gene Sequences **469**

**G. Lucotte, S. Hazout**
Y-Chromosome DNA Haplotypes in Basques **472**

**L.S. Jermiin, P.G. Foster, D. Graur, R.M. Lowe, R.H. Crozier**
Unbiased Estimation of Symmetrical Directional Mutation Pressure from Protein-Coding DNA **476**

## No. 5, May 1996

**Random Walking** **481**

**J.F. Allen, J.A. Raven**
Free-Radical-Induced Mutation vs Redox Regulation: Costs and Benefits of Genes in Organelles **482**

**M. Beljanski**
De Novo Synthesis of DNA-Like Molecules by Polynucleotide Phosphorylase In Vitro **493**

**M.C. Field, J.C. Boothroyd**
Sequence Divergence in a Family of Variant Surface Glycoprotein Genes from Trypanosomes: Coding Region Hypervariability and Downstream Recombinogenic Repeats **500**

**J. Doskočil**
The Amplification of Oligonucleotide Themes in the Evolution of the *myc* Protooncogene Family **512**

**S.G.E. Andersson, P.M. Sharp**
Codon Usage and Base Composition in *Rickettsia prowazekii* **525**

**C. Buades, A. Moya**
Phylogenetic Analysis of the Isopenicillin-N-Synthetase Horizontal Gene Transfer **537**

**A. Van Wormhoudt, D. Sellos**
Cloning and Sequencing Analysis of Three Amyase cDNAs in the Shrimp *Penaeus vannamei* (Crustaceia decapoda): Evolutionary Aspects **543**

**L.Y. Mackey, B. Winnepenninckx, R. De Wachter, T. Bakeljau, P. Emcshermann, J.R. Garey**
18S rRNA Suggests That Entoprocta Are Protosomes, Unrelated to Ectoprocta **552**

**B. Prakash, S. Selvaraj, M.R.N. Murthy, Y.N. Sreerama, D.R. Rao, L.R. Gowda**
Analysis of the Amino Acid Sequences of Plan Bowman-Birk Inhibitors **560**

**L. Guan, J.G. Scandalios**
Molecular Evolution of Maize Catalases and Their Relationship to Other Eukaryotic and Prokaryotic Catalases **570**

**G.-J. Caspers, G.-J. Reinders, J.A.M. Leunissen, J. Wattel, W.W. De Jong**
Protein Sequences Indicate That Turtles Branched Off from the Amniote Tree After Mammals **580**

**Z. Yang**
Maximum-Likelihood Models for Combined Analysis of Multiple Sequence Data **587**

*Letter to the Editor*
**D.W. Schultz, M. Yarus**
On Malleability in the Genetic Code **597**

**ISME Membership Listing** **603**

## No. 6, June 1996

**R.P. Ambler**
The Distance Between Bacterial Species in Sequence Space **617**

**K.E.M. Hastings**
Strong Evolutionary Conservation of Broadly Expressed Protein Isoforms in the Troponin I Gene Family and Other Vertebrate Gene Families **631**

**A.M. Jellie, W.P. Tate, C.N.A. Trotman**
Evolutionary History of Introns in a Multidomain Globin Gene **641**

**Y. Satta, W.E. Mayer, J. Klein**
Evolutionary Relationship of *HLA-DRB* Genes Inferred from Intron Sequences **648**

**C.M. Westhoff, D.E. Wylie**
Investigation of the RH Locus in Gorillas and Chimpanzees **658**

**F. Brunet, F. Godin, C. Bazin, J.R. David, P. Capy**
The *mariner* Transposable Element in Natural Populations of *Drosophila teissieri* **669**

**J.R. Kornegay**
Molecular Genetics and Evolution of Stomach and Nonstomach Lysozymes in the Hoatzin **676**

**R.C. Cronn, X. Zhao, A.H. Paterson, J.F. Wendel**
Polymorphism and Concerted Evolution in a Tandemly Repeated Gene Family: 5S Ribosomal DNA in Diploid and Allopolyploid Cottons **685**

**S. Evers, B. Casadewall, M. Charles, S. Dutka-Malen, M. Galimand, P. Courvalin**
Evolution of Structure and Substrate Specificity in D-Alanine:D-Alanine Ligases and Related Enzymes **706**

**T. Burmester, K. Scheller**
Common Origin of Arthropod Tyrosinase, Arthropod Hemocyanin, Insect Hexamerin, and Dipteran Arylphorin Receptor **713**

**Index to Volume 42 729**
